**HACKATHON REIMAGINING THE
FUTURE OF HIGHER EDUCATION**

SEK El Castillo

ABOUT US

THE FUTURE OF HIGHER EDUCATION BY “SEK El Castillo”

SEK El Castillo is an International school in Madrid .

We are the Cherry group! Were 2nd of Diploma students but each group varied between grades. Our teachers from LOMCE and Diploma helped facilitate this process along with us.

Through this experience we have learnt how to work together in harmony this means being able to listen to each other's ideas and take suggestions. We have gotten a deeper insight on the highs and lows of university which have been very eye opening learnign that everything comes at a Price and to always understand what goes into something some people consider simple.

&

DEFINE the areas to focus upon

There is a lack of money and resources when it comes to helping students financially.

Fresh out of high schoolers are expected to be able to live independently without prior knowledge or experience leaving them without basic skills.

Students experience a decline in mental health and may be suffering emotionally through their university years.

University students, as well as their families, friends and peers are affected by these problems.

Universities fall short when trying to resolve these issues.

Some benefits of solving said problems would be:

- Lower suicide rate
- More opportunities for people who deserve it
- A more equipped society

**DELIVER
solutions
that work**

Our solutions base themselves on additions in the universities' curriculum , eliminating the lack of financial aid given out, and keeping the increasing importance of mental health.

Their impact involves the students well being especially when keeping mental health's importance in universities. The basic life skills workshop will help students acquire skills that will impact their well being and self sufficiency in the future.

With our solution we gain a lower suicide rate according to the statistic that said, "Around 10% of Spanish university students say that they have experienced suicidal thoughts, and just under 1% that they have attempted suicide, in the last 12 months, with no differences detected in relation to the gender of those questioned."

CHALLENGE What 3 things should it keep, 3 things should it add, and 3 things should it eliminate?”

Universities should **keep** the importance of mental health

More and more colleges are using an online platform called Kognito that helps students learn how to talk to friends who may be suffering emotionally, directing them to appropriate resources and more.

They should **eliminate** the lack of money and resources when it comes to helping students financially

Because students in developing countries are at a lower advantage point than most college students therefore eliminating this lack of financial aid is advised

Solution: Broadening the eligibility requirements for scholarships that will enable students to have access to higher education.

They should **add** new subjects and workshops that are designed to increase student knowledge and skills necessary for everyday living.

Since fresh out of high schoolers are expected to be able to live independently without prior knowledge or experience leaving them without basic skills

Solution: Mandatory workshops that allow students to learn basic skills such as laundering, ironing, cooking, and cleaning; since these are vital.
