**HACKATHON: REIMAGINING THE  
FUTURE OF HIGHER EDUCATION**

*SEK Atlántico International School*

## ABOUT US

### THE FUTURE OF HIGHER EDUCATION BY “SEK Atlántico International School”

*We are students from the SEK Atlántico International School (Manuel Fernández Moldes, Martín Amorín Gonzalez, Beltrán De María Álvarez, Agustín Brito Hernández and Daniel Ochoa Muñoz) and we all have a great level of English( B2certificate ). We like practicing sports and thats why we want an interactive and exciting university for us in the future.*

1

### **THINGS THAT WE MUST ADD TO A UNIVERSITY.**

Following our point of view we must add the following things:

- Better accommodations and facilities.
- More and better technological knowledge and technology.
- More interactive and practical classes that prepare students for the future.

2

### **Things a university must keep.**

These are the things that we think that must be kept in a university

- Teachers' professionalism
- Extracurricular activities
- Flexible academic schedule

3

### **Things a university must eliminate.**

Finally, we tell the things a university must eliminate.

- Eliminate big classes
- Unnecessarily long degrees
- Reduce the cost of entering university

## THINGS THAT WE MUST ADD TO A UNIVERSITY.

*As a PAI V students, we haven't even entered the university, although with the help of our family we achieve to develop these 3 points.*

*Firstly, we will like better accommodations and facilities for the students, for them to have better relationships between them. Also, this will help to have a multicultural development between the students that will make them grow as persons.*

*Secondly, more and better technological knowledge and development, the world is changing and new technologies are developing at an immense rate so the students will need more technological knowledge for the future.*

*Finally, more interactive and practical classes, the universities are known for having too much material to study, therefore we think that the classes and exams should be more practical because this will give a better preparation for the students.*

## Things a university must keep

- *From the point of view of an MYP V student, the university must have a proper plan that is really well thought and established, these are the 3 things that we think that universities should keep to achieve that plan.*
- *1. The universities are well known for having a great plenty and incredibly prepared teachers that are professionals in their own subjects, and that give a great professional environment to the classes.*
- *2. Nowadays the universities have extracurricular activities that help students to disconnect a little bit of time after classes, also they help to make students to stay with a healthy mind.*
- *3. Lastly, the flexible academical schedule, we get to choose when we have classes so if having a class at a certain hour is an inconvenience you have a choice of not going at that hour. This also frees opportunities for family time and extracurricular activities.*

3

Things a university  
must eliminate.

## Things a university must eliminate

*From the point of view of a MYP V student these are the 3 things that our ideal future university must eliminate from current Universities.*

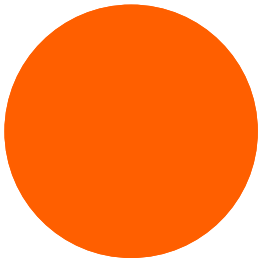

- 1. The universities of today are known for having classes with a great size, its not uncommon to see classes of 70 persons or more, this should be eliminated because make the relationship between students and teachers more difficult because of the great amount of persons that a teacher must take attention off.*
- 2. The degrees nowadays are really long, this one can reach from. 5 to 10 years, this is an amount time really big, so from our point of view a future ideal university must take this times out and decrease the time to 3 years maximun.*
- 3. Finally, we want to reduce the cost of going to university, this is because the big amount of money that cost to enter it and the thousands of person that day by day can ´t pay their self a university*
